

### **SUMMARY:**

- Full Stack .NET Developer with over 5+ years of coding experience. Proven skills in application development and system configuration. Frequently acknowledged for friendly customer service.
- Proficient in developing web and windows applications using C#, ASP.NET, VB.NET, ADO.NET with SQL server as back end.
- Exposure to .NET Framework 4.7/4.8, .Net Core 3.1/6 and SQL Server 2018/2020.
- Expertise in developing various applications using Visual Studio .Net technologies such as C#, Azure, ASP.NET, ADO.NET, WCF, WPF, LINQ, AJAX, SQL Server, SOAP, RESTFUL SERVICES, MVC and MVVM.
- Experienced in developing User Controls and Custom Controls in C# and ASP .Net.
- Thorough working knowledge of Object-Oriented Programming concepts for reusability and security.
- Hands on experience in design using Object Oriented Programming Principles like Encapsulation, Inheritance, Polymorphism and Abstraction.
- Expertise in creating and developing WCF (Windows Communication Foundation) applications using Visual Studio 2018.
- Highly proficient in using T-SQL for developing complex Stored Procedures, Tables, Views, Indexes, Triggers, User Defined Functions, SQL Joins and performance-based query writing using SQL Server 2018.
- Experienced in fast paced Agile development environment including SCRUM and Test-Driven Development (TDD)
- Strong knowledge and working experience in developing Web applications using JavaScript, Ajax HTML, XML, and CSS.
- Intensive on working with front end and User Interface with ASP.NET, Web API, XML, HTML, CSS, JavaScript, jQuery, Telerik, UI Controls Dev Express tools.

### **TECHNICAL SKILLS:**

- **Programming:** C# .NET, VB.NET, ASP.Net, XML
- **Platforms:** Microsoft .NET Framework 4.8/4.7/4.0, object model, AJAX, HTML, MS Build, Microsoft Enterprise Library, Entity Framework, Workflow Foundation, Web Services, WCF, SSIS, Web API, WCF, Azure, Jira, Git
- **Web Technologies:** ASP.NET MVC, ASP.NET Web Forms, AJAX, WCF Web Services, REST API Service, Web API, WCF, Angular 9/12 /13
- **Database:** SQL Server 2016/2015/(T-SQL)
- **Development Tools:** Visual Studio 2019/2017, TFS, Web API, WCF, SQL Profiler, GIT
- **Protocols:** SOAP, SSL, FTP, TCP/IP, HTTP, SMPT
- **Reporting Services:** Crystal Reports, SQL Server Reporting Services (SSRS)
- **Enterprise Servers:** IIS Server, Content Management Server
- **Operating Systems:** Windows 10/11
- **Testing Frameworks:** QA Testing, Unit Testing, Integration Testing, Automation Testing
- **Methodologies:** SDLC, Agile
- **Web Servers:** IIS 10, 8.5

## **PROFESSIONAL EXPERIENCE:**

### **CHATTER COMMUNICATIONS**

*Full Stack .Net Developer*

**Jul 2023 – Current**

- Designed, developed, and maintained scalable applications using .NET (Core & Framework) and C# in telecommunication systems.
- Built and consumed RESTful APIs and microservices architectures to enhance system integration and performance.
- Enhanced existing .NET applications by refactoring legacy code, implementing modular design patterns, and improving maintainability.
- Implemented server-side validations, exception handling, and logging mechanisms to ensure robust and error-free application performance.
- Developed and integrated WCF services and Web APIs to support high-volume transactional operations in telecom workflows.
- Optimized application performance using multithreading, asynchronous programming, and caching strategies in .NET applications.
- Implemented Azure cloud services for deployment, configuration management, and resource optimization.
- Created and optimized complex SQL Server queries, stored procedures, and triggers to manage large telecom data volumes.
- Leveraged GitHub Copilot to accelerate code generation and integrate AI-driven development efficiency.
- Used GitHub for version control and Octopus Deploy for CI/CD pipeline automation.
- Participated in Agile Scrum ceremonies, collaborating closely with cross-functional teams for iterative releases.
- Developed dynamic front-end interfaces using Angular and React, ensuring responsive and intuitive user experiences.

### **LATTER DAY TECHNOLOGIES, HYDERABAD, INDIA**

*Full Stack .Net Developer*

**Jun 2020– Jul 2022**

- Designed and implemented business logic using C#, abstract classes, interfaces, and OOP principles for scalable telecom applications.
- Developed ASP.NET MVC and ASP.NET Core Web API applications with Razor views, master pages, partial views, and reusable frameworks.
- Built dynamic front-end interfaces using Angular and React, implementing client-side validations and interactive components.
- Worked extensively with RESTful APIs, WCF services, SOAP, XML, and microservices architecture for system integration.
- Deployed applications to Azure App Services, managing CI/CD pipelines and cloud-hosted Web APIs.
- Designed and optimized SQL Server databases, including stored procedures, triggers, views, and Entity Framework-based data access.
- Followed Agile methodologies, collaborated with cross-functional teams, and managed version control using GitHub and deployments with Octopus Deploy.
- Integrated GitHub Copilot to improve coding efficiency and accelerate development of new features.
- Implemented caching, exception handling, and multithreading to improve application performance and reliability.
- Developed reporting solutions using SSRS and Crystal Reports, providing actionable insights through tables, charts, and sub-reports.

- Designed and developed scalable Insurance applications using .NET and C#, improving system efficiency and reliability.
- Implemented Azure cloud services for deployment, storage, and secure access to insurance applications.
- Created and consumed RESTful APIs for seamless integration with third-party services and partners.
- Developed microservices architecture to modularize insurance systems and improve maintainability.
- Automated policy issuance, premium calculation, and claims workflows using C# and .NET background services.
- Built and maintained SQL Server databases for policy management, claims processing, and customer data.
- Implemented error handling, logging, and exception management to ensure high application reliability.
- Optimized SQL queries, stored procedures, and triggers to handle large volumes of insurance transactions efficiently.
- Ensured secure coding practices and compliance with insurance regulations for sensitive customer data.
- Participated in Agile Scrum ceremonies, including sprint planning, daily stand-ups, and retrospectives.
- Designed interactive dashboards for policy analytics, claims insights, and customer reporting.
- Developed responsive front-end interfaces using Angular and React for insurance portals and dashboards.
- Collaborated with cross-functional teams to deliver enhancements and bug fixes in legacy and modern systems.
- Conducted unit testing, integration testing, and debugging to maintain high-quality insurance applications.

**EDUCATION:**

Master's in Computer Science 2022- 2023

New England College, New Hampshire
